

Regarding design I have all HTML files , Still if u need help from designer help let me know , regarding design I don't waste a single day for RND for design task. This design task is really very simple, u no need need to create any new design template or new HTML.

Design  **Denotes design work**

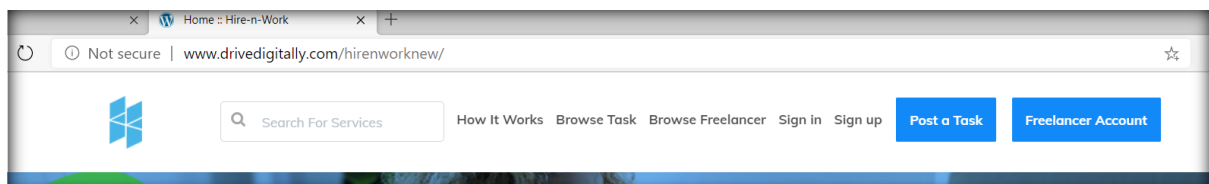

PLEASE, HAVE A LOOK DETAILS

Merge Point

Merge Point : <http://www.drivedigitally.com/hirenworknew/>

From the above mentioned server need to merge some of the below points .

1. Home page menu design (Before Login)

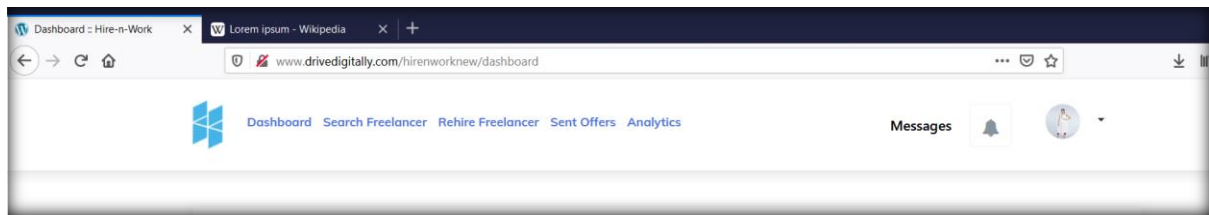

Remove Account from “freelancer account “ (once hover the button need to add a popup “ get earn create freelancer account”)

Add a button with “Room” “ (once hover the button need to add a popup “ Outside of portal? Don't have account for quick earn get account for freelancer for search talent for ur project get client room account .”)

2. After login menu design & hover design.

Merge Micro key (Freelancer + Client)

Micro key for freelancer & client already done u need to put a algorithm based on coin, review & skill.

Analytics for (Freelancer + client)

Merge room (freelancer + client)

Room is a concept where customer can work outside of portal , This is another section of HW where outsider freelancer + client (not necessary to have an account of key mode or micro key mode) can join & create account also invite to their client + freelancer do the job as well.

- **Once room customer singup a quinque ID generate (already done)**
- **Then they can login (already done)**
- **After that client can send make offer to freelancer (already done)**
- **After login freelancer & client get there own id & user name through mail. (already done)**
- **They can chat over message (already done)**
- **Once the freelancer get hired by client then all flow like main portal (already done)**

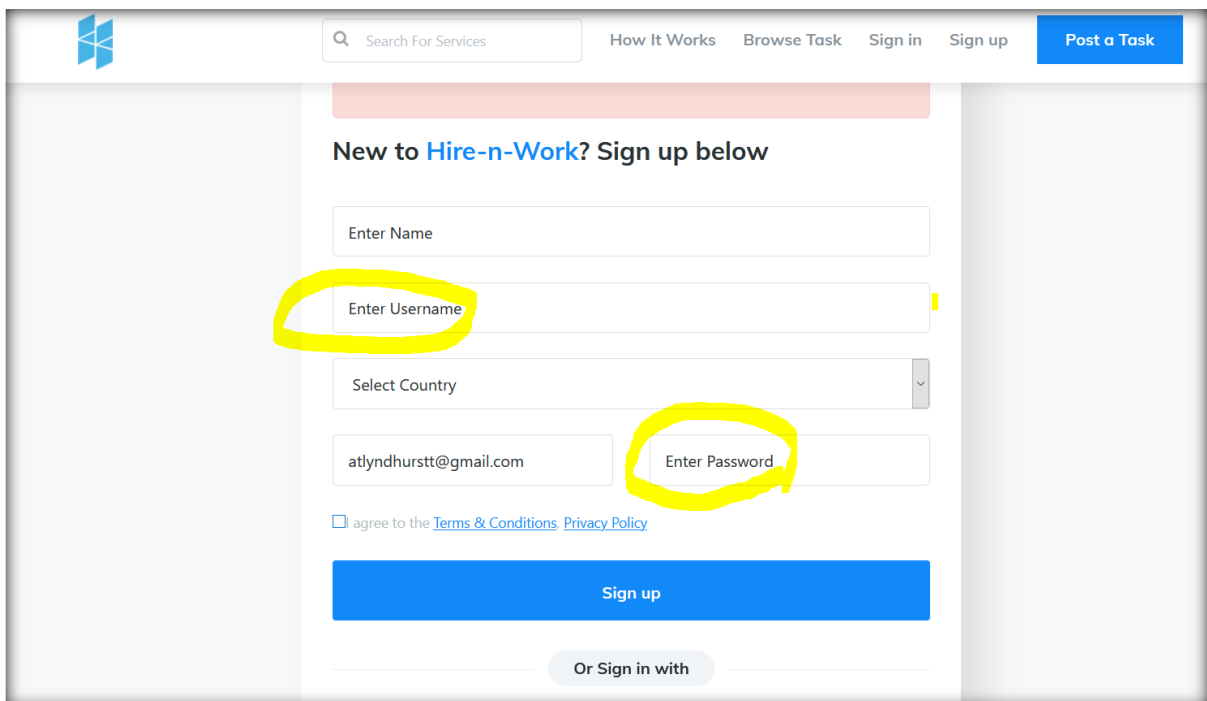

The above all function already done , u need to make a new another dashboard & copy the function from main portal then implement at new dashboard.

As they r the member of room so they can post proposal or task like core member of HW, if they want for the same then they need to create client & freelancer account . in this case u need to make disable all core function for room member, once room member tried to do for the same they get a message “ for post task u need to create client account , for post proposal u need to create freelancer account.

After complete this merge area start work on the below points .

1. Login with Linkedin, Google (May be google login done)

Sing up for all client , freelancer, room

In the section of user name there will a notify popup to the all user “ User name will be unique , so choose ur username consciously “

Password section there will a notify popup to the all user “ password should be , Capital , small, number & special character combination with 8 digit.”

Freelancer:

Under freelancer bio need a mandatory section for

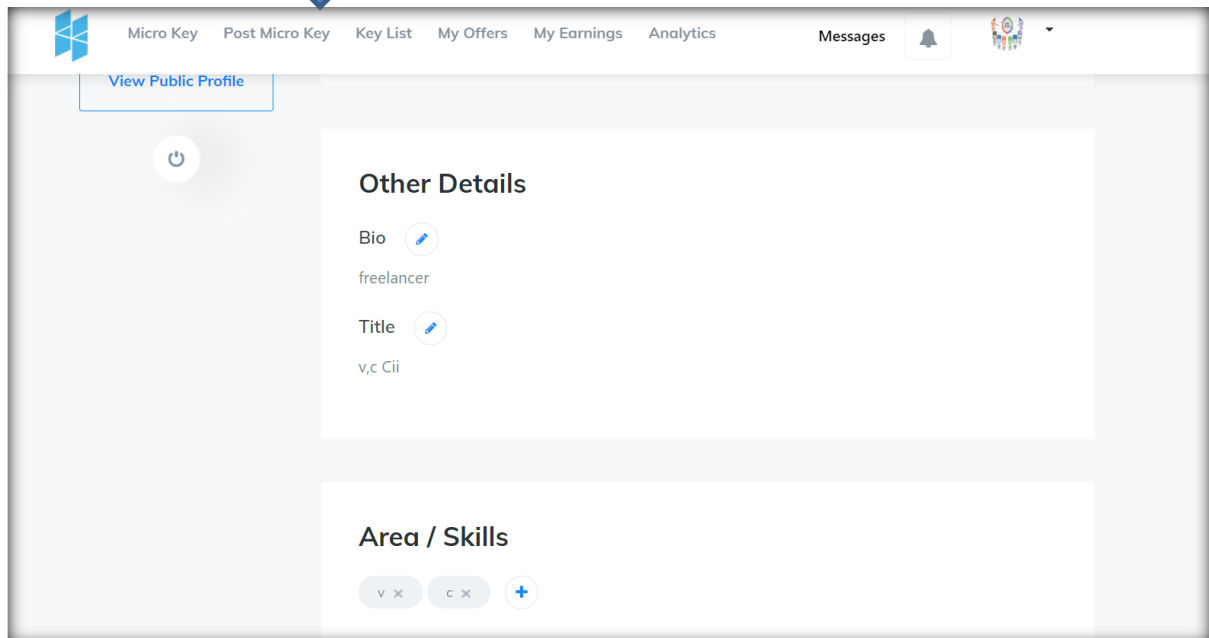

- Photo
- Email

- User name
- Mobile
- Skill
- Address
- Bio

Change password is not working ,

After active the freelancer profile , freelancer cant be change , photo, email, username , mobile.

After fill up freelancer bio then submit, then freelancer get notification that “profile is under review after 3 to 4 dys if all the data correct then this will active.”

At admin section need a freelancer active section where all active freelancer listed.

Make this design well, similar color with logo.

Design

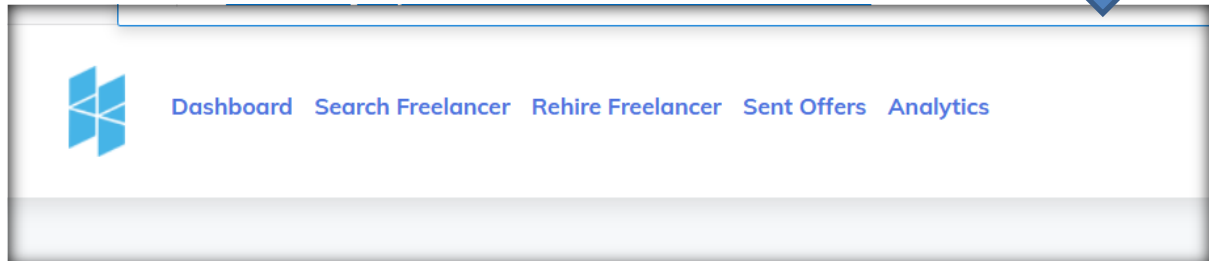

Client

<https://www.drivedigitally.com/hirenwork/task-details/WWVSEMYADE>

Design

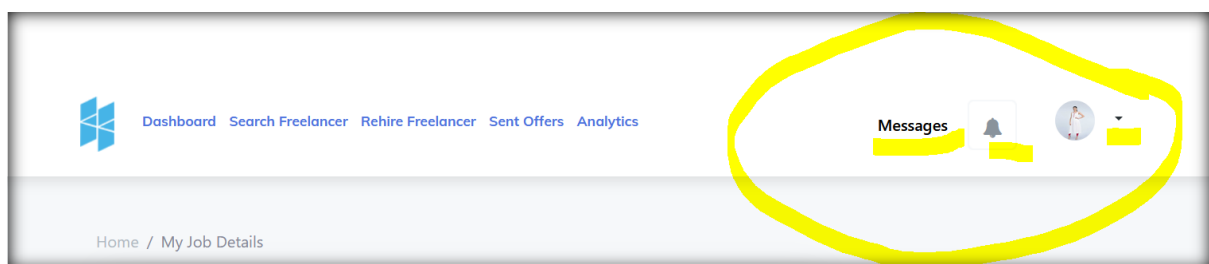

Once scroll down the page the header menu colour automatically change in grey , it should not be change , it should be blue as it now. Same implement for freelancer section

Design

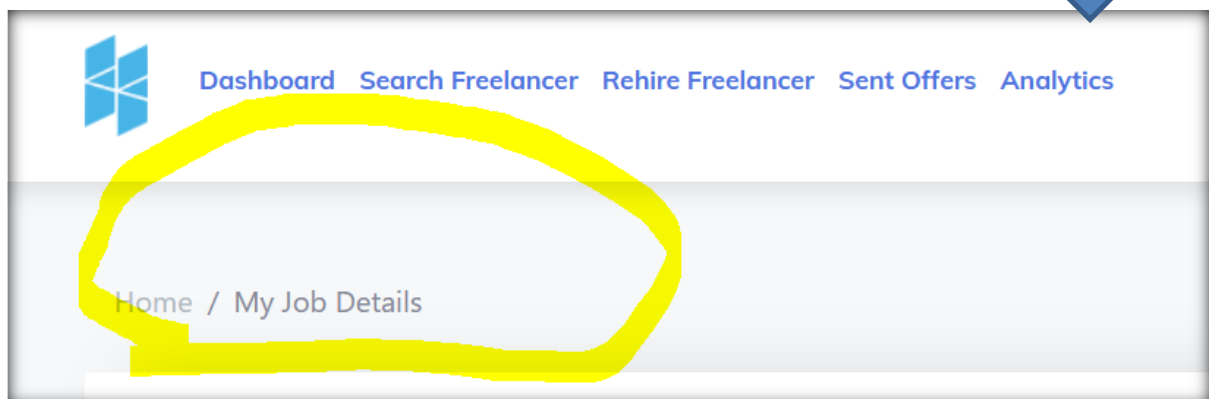

Also in message & notification button colour & hover should be change in blue like header other menu.

Check the 3 marked area. Same implement for freelancer section

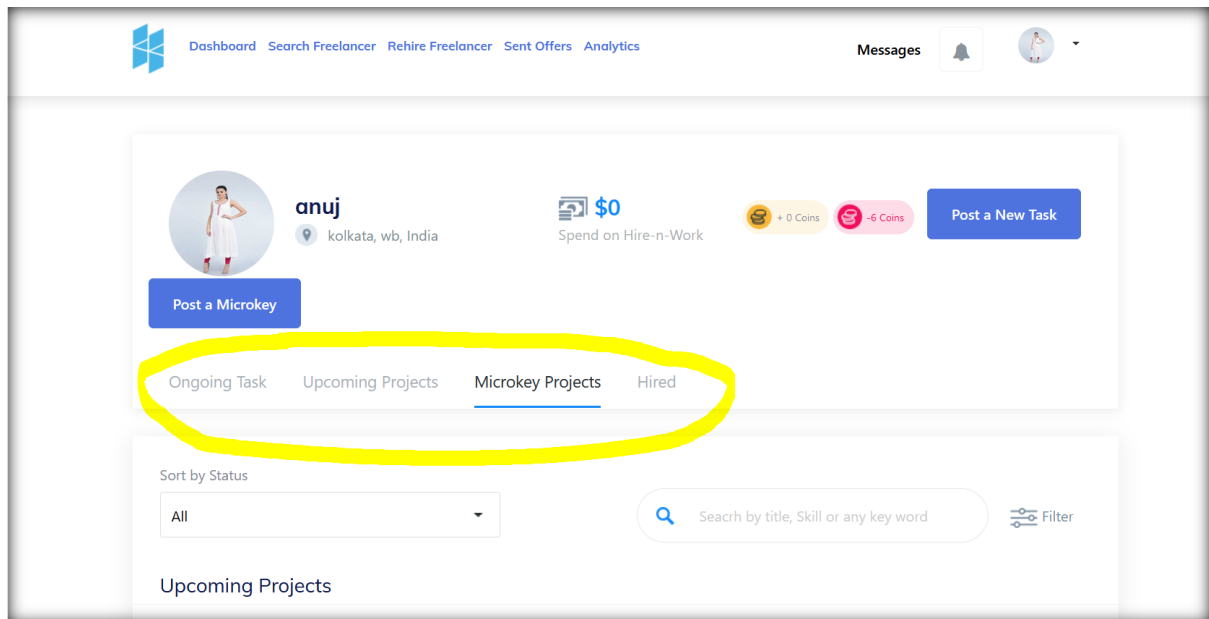

Design

In this area should be more prominent, with hover (already hover effect done , need more project) Same implement for freelancer section

Design

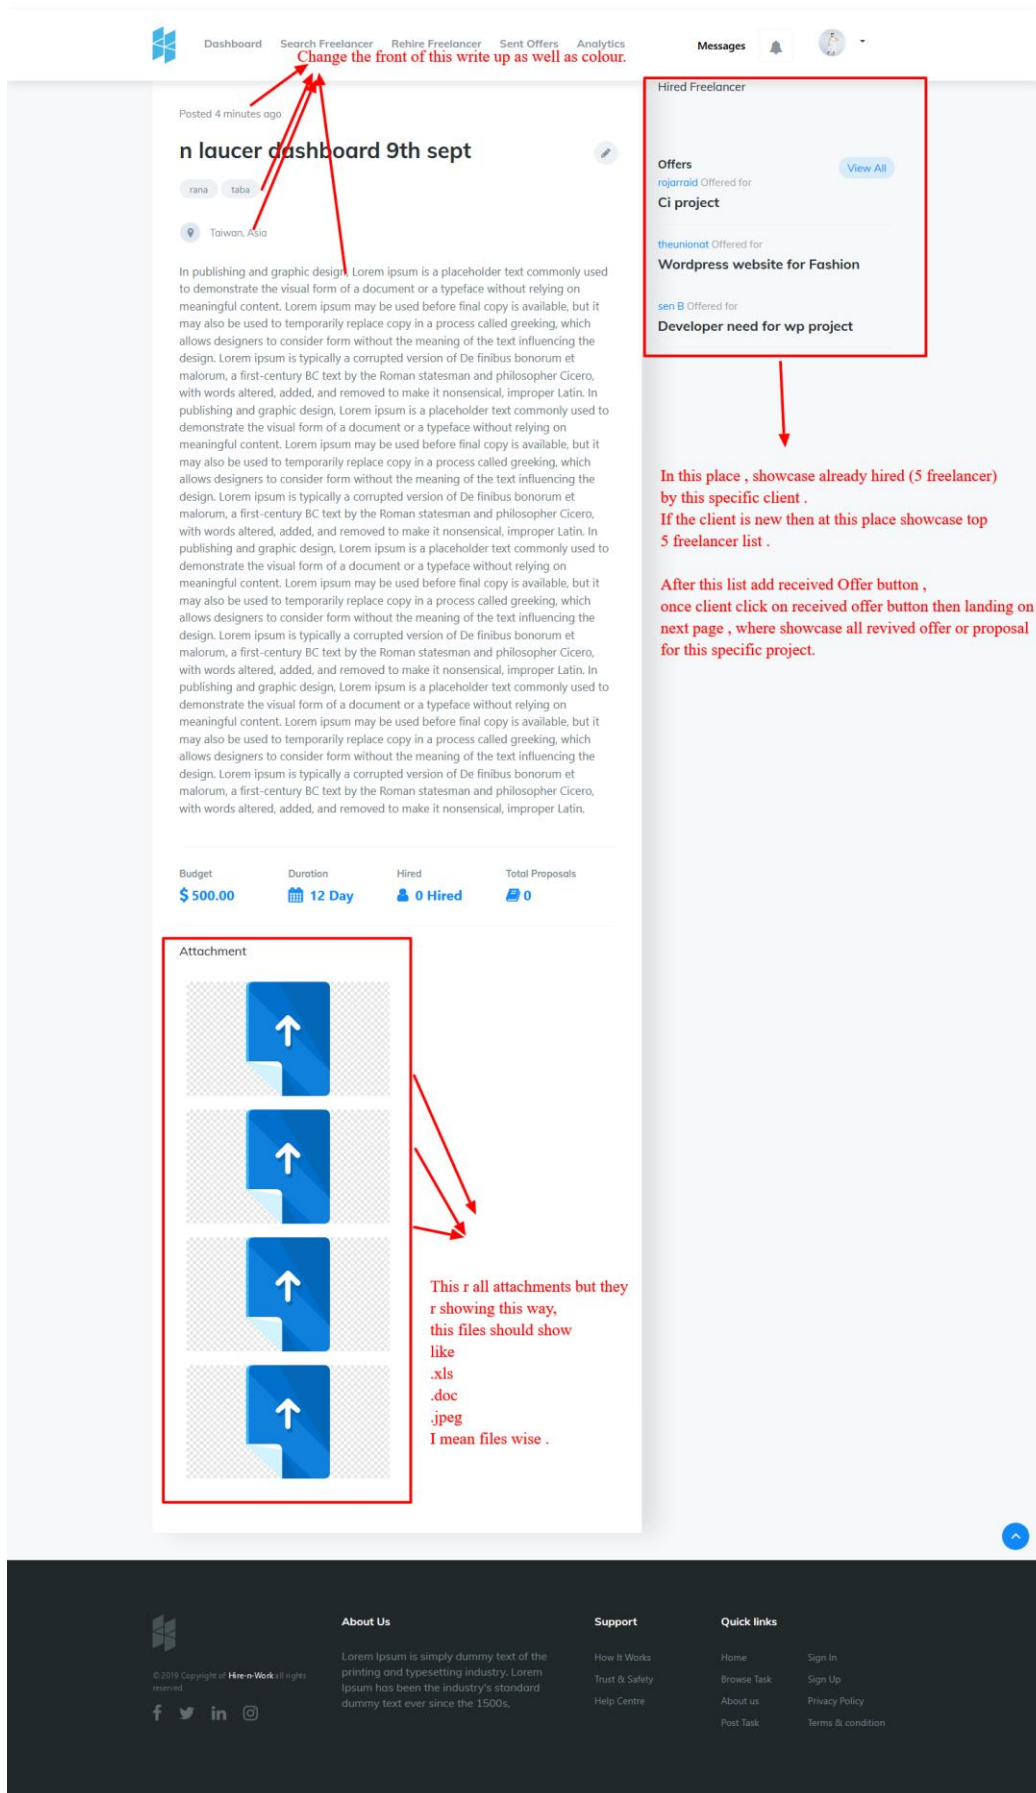

For this menu hover effect hover effect blue with blue underline. Without hover black.

2. Client:

Check the Image : Job_Details_Hire_n_Work1 & see the instruction of change.

In publishing and graphic design, Lorem ipsum is a placeholder text commonly used to demonstrate the visual form of a document or a typeface without relying on meaningful content. Lorem ipsum may be used before final copy is available, but it may also be used to temporarily replace copy in a process called greeking, which allows designers to consider form without the meaning of the text influencing the design.

The screenshot displays the Hire-n-Work dashboard for a client. At the top, there's a navigation bar with links: Dashboard, Search Freelancer, Rehire Freelancer, Sent Offers, Analytics, Messages, and a user profile icon. The main section is titled 'Need for tsest purpose' with a 'Task Details' link. Below this, there are five summary cards: Total (\$500), Spend (\$0), Remaining (\$0), In Escrow (\$0), and MileStones (1). A client profile for 'sen B' from India is shown, with buttons for 'Send Message', 'Close Contract', and 'Raise Problem To Hire-n-Work'. Below the profile, there's a table with contract details. A red arrow points to the 'Title' column header, with the text 'ONLY project title.' next to it. The table has columns for Title, Due Date, Amount, Status, and Payment Status. The first row shows a task description, a due date of 10/09/2020, an amount of \$0, a status of 'No Request Yet', and a payment status of 'Deposit Fund'. At the bottom, there's a footer with 'About Us', 'Support', and 'Quick links' sections.
